Hemanth Anumolu

Senior Front-end Engineer

I am a Senior Frontend developer with an engineering background. With 9 years of experience in building enterprise-grade web applications, working with diverse teams from small start-ups to large enterprises like Adidas, Unilever, Sivantos, Rockwell Automation and Cyient. Passionate about visualising ideas and building products, loves embracing challenges and looks upon them as opportunities to grow and develop. A deep set of skills and vast experience in the area of web development(Frontend), visual design and UI/interaction design.

Experience

Mar 2019 - Present

Adspert GmbH, Berlin, Germany

Senior Front-end Engineer

- Technical lead for all front-end projects.
- Leading the Frontend development for our SaaS-based Ad bidding optimization application developed using Angular. Was involved in all the phases right from Ideation, Design, and Development to Deployment
- Developed a shared login portal for all the user-facing and internal apps using VueJS.
- Involved in design and architectural decision-making for new projects.

Mar 2016 - Feb 2019

QueryNow GmbH, Germany

Senior Technical Consultant

- Led the front-end module for a microservice-based SaaS product which supports multi-tenant, multi-lingual, multi-theme, offline-ready and mobile-first responsive Progressive Web Application.
- Led the front-end team to develop an investment portfolio reporting and analysis application with complex data visualizations for a FinTech company.
- Researched and architected a big single-page application with a custom build system and deployment strategy which served as a core module, on top of which fellow developers were able to build intranet portals for Enterprises.
- Built Dynamic Forms Framework using Angular 6, which helped fellow developers create forms without the need to write code.

Mar 2015 - Dec 2015

Mindtree, India

Senior Software Engineer

- Lead Developer in creating SharePoint-Hosted Web Apps.
- Co-presented in many internal training programs with fellow colleagues.

Oct 2012 - Mar 2015

Cyient, India

Software Engineer

- Lead Developer responsible for developing, customizing and maintenance of the SharePoint-based Intranet portal for the enterprise.
